

# Computer Code

The background of the image features a light gray grid pattern. Overlaid on this grid are various numbers, primarily '1's and '0's, rendered in a pixelated, digital font. These numbers are colored in a variety of pastel shades including yellow, cyan, magenta, and light blue. Some of the numbers are sharp and in focus, while others are blurred, creating a sense of depth and movement. The overall aesthetic is reminiscent of early computer graphics or digital art.

# Use of Codes

## ANCIENT EGYPT HIEROGLYPHICS

# What types of code do computers use?

# Source code is written using a human-readable programming language

- Python
- C++
- R
- Java
- HTML
- Perl
- Ruby
- Scratch
- Ozoblockly

Just like English can be translated to Spanish...

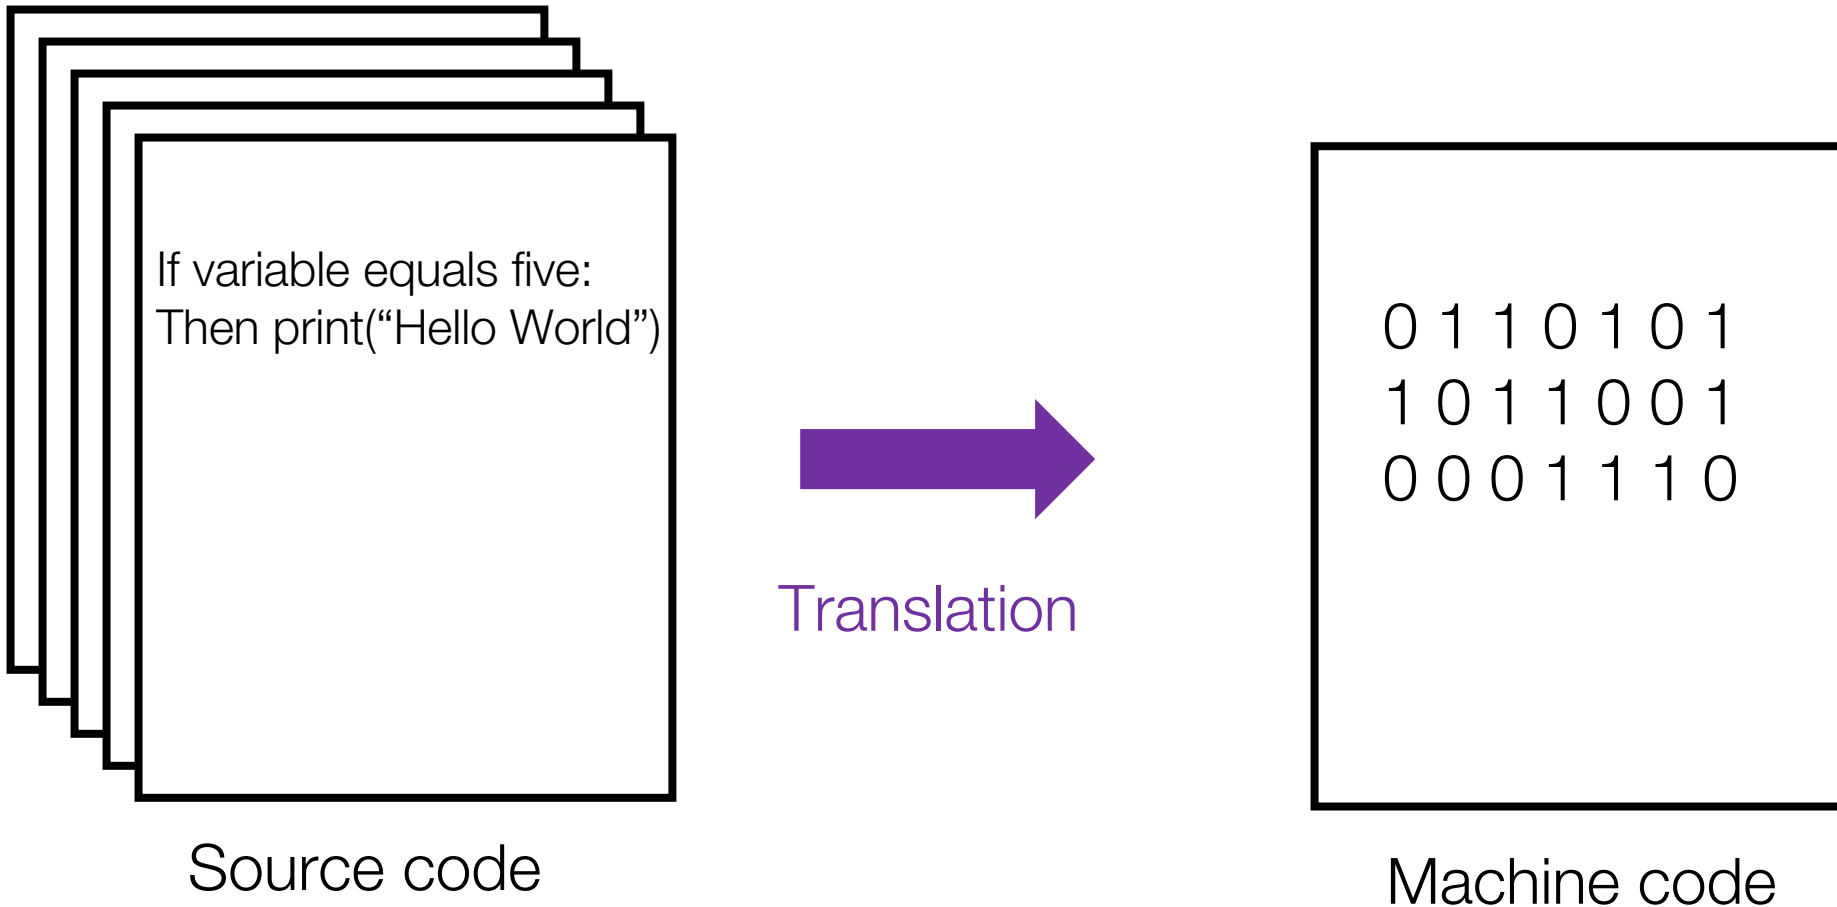

Hi! How are you?

Translation

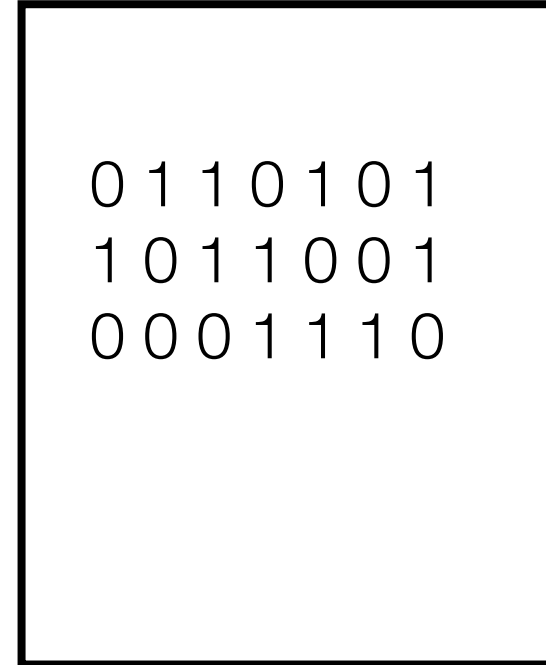

¡Hola! ¿Como estás?

# ...Source code is translated to machine code

# Machine code is also called binary code

- A language made entirely of 0 and 1
- Run by the central processing unit (CPU)
- Binary is a system of numerical notation using only 0 and 1
  - Binary arithmetic uses base 2, we usually use base 10

```
0 1 1 0 1 0 1
1 0 1 1 0 0 1
0 0 0 1 1 1 0
```

Machine code

# Counting in binary!

Base 10

2	7
$10^1$	$10^0$
10	1

$$10 \times 2 + 1 \times 7 = \underline{27}$$

Base 5

1	0	2
$5^2$	$5^1$	$5^0$
25	5	1

$$25 \times 1 + 5 \times 0 + 1 \times 2 = \underline{27}$$

Base 2

1	1	0	1	1
$2^4$	$2^3$	$2^2$	$2^1$	$2^0$
16	8	4	2	1

$$16 \times 1 + 8 \times 1 + 4 \times 0 + 2 \times 1 + 1 \times 1 = \underline{27}$$

# How to count in binary (base 2)

$2^4$	$2^3$	$2^2$	$2^1$	$2^0$	
16	8	4	2	1	
0	0	0	0	0	0 0

# Boolean: binary variable with two possible values

1

0

TRUE

FALSE

Statement	Binary notation	Boolean notation
The sky is blue	1	 TRUE
The Earth is flat	0	 FALSE

If you like the color pink:

Put your thumb up

Else:

Put your thumb down

If you like chocolate:

Put your thumb up

Else:

Put your thumb down

If you were born in Michigan:

Put your thumb up

Else:

Put your thumb down

If you like dogs:

Raise your right hand

Else if you like cats:

Raise your left hand

Else:

Keep your hands down

If you like to read:

Raise your right hand

Else if you like to watch tv:

Raise your left hand

Else:

Keep your hands down

# Conditional statement

If something is TRUE:

Then do something

Else if something is TRUE:

Then do something

Else:

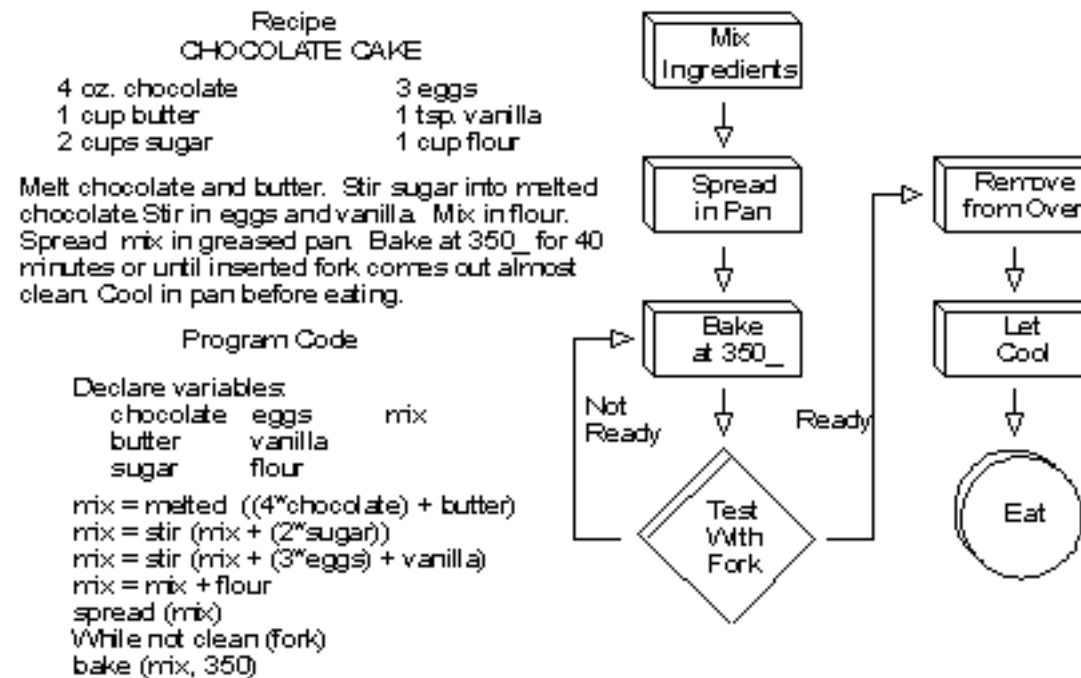

Do something

Let's get coding!

# We write algorithms with source code to make the computer do what we want

- An algorithm is like a recipe
- A process or set of instructions for the CPU to follow

We are going to write source code that uses an **algorithm** to convert base10 to base2 numbers!

Goal: Turn your Ozobot into a decimal to binary number converter with booleans and conditional statements!

Use source code to:

1. Make the Ozobot follow the correct path
2. Check your answers to decimal-binary number conversions
